

Wrappa Sleeve: Standard Wrap Around Sleeving

Wrappa Sleeve is a self-extinguishing, lightweight wraparound sleeving for all shapes of cables and harnesses with a 150% capacity. It provides flexibility, spring back and high resistance to abrasion. It is designed to protect wiring, cables, pipes, hoses and foam insulation from mechanical degradation arising from exposure to touch conditions in vibrating installations. It can be installed by opening up the sleeve, feeding over the application and releasing.

Specification.

Material:
Woven Polyethylene Terephthalate

Colour options:
Black

Service temperature range:
-50°C to +150°C

Melting Temperature:
250°C

Flammability:
UL224 VW-1 Self-Extinguishing

Chemical resistance:
Resistant to ammonium hydroxide, chlorine, diesel, detergents, ethanol, hydrochloric acid, inorganic solvents, mineral oils, white spirit and most chemicals and common fuels.

Standards:
UL 224 Approved
