

Self-amalgamating black tape.

Key features.

- Produces strong waterproof joints which insulate and prevent corrosion
- After the tape has been stretched and wrapped around cables, joints, pipes etc, it gradually amalgamates (or flows) into itself
- Compatible with all extruded dielectric cable insulations
- Excellent physical and electrical properties
- Excellent resistance to ozone & prolonged immersion in water
- Non-tacky, clean and easy application
- Rapid self-amalgamation when applied under tension
- Void-free, homogenous insulation without the need for heat or pressure
- Clean remove
- Non-hardening
- Long life-span

Specification.

Colour:
Black

Dielectric strength:
53Kv/mm

Standards:
Tested to ASTM D149

Total thickness:
0.5mm

Elongation at break:
650%

Tensile strength:
2MPa

Temperature resistance:
-40 to 90°C

Approvals:
RoHS compliant

Part number	Width (mm)	Pack (m)	Pack quantity
CSAT 1	19	10	1
CSAT 2	25	10	1
CSAT 3	50	10	1
